VUIW Undercounter Induction Warmer

18"W. Incogneeto™ Induction Warmer

- Designed to be mounted directly under stone or engineered stone countertops
- The unit mounts underneath the counter with no drilling or cutting of the stone required
- 650 watts of power
- Offers four selectable temperature settings: 150°/160°/175°/190°F (65°/70°/80°/85°C)
- The Magneeto™ II trivet-like device is used on the upper surface of the countertop to locate the heat zone and acts as a temperature sensor
- Touch control user interface with SmarTag™ Technology uses a wireless communicator to provide precise temperature control
- Cookware/bakeware up to a diameter of approximately 12” (30.5 cm) with an induction compatible base can be used
- Automatic pan detection allows for instant energy transmission to pan and no energy transmission when pan is not present
- Can combine up to three units per 15 amp circuit
- A beautiful piece of natural stone or “engineered stone” can transform into an induction warmer capable of holding food within 2°F

Proper Installation/Ducting Is Extremely Important To Ensure Maximum Performance From Any Ventilation Product

- All CFMs stated based on tests with .1 static pressure: without applying static pressure (some brands consciously do not), CFM could be greatly overstated.
- Duct run length is for general reference only; for longer duct runs, increase duct size and contact a qualified and trained installer.
- Straight runs and gradual turns are best; for example, each 90° elbow is equivalent to 5-10 feet (1.52-3.05m) of straight run.
- Never use flexible duct; it creates back pressure/air turbulence and greatly reduces performance.
- Proper performance is dependent upon proper ducting; make sure that a qualified and trained installer is used.
- Check with a qualified and trained installer or local codes for makeup air requirements, if any.
- Max. amp rating for hoods includes recommended ventilator kit rating; all products must be hard wired direct with 2-wire with ground
- A 1200 or 1500 CFM (if applicable) ventilator kit, or in-line blower should be used when installed over range/rangehoods with gas char-grill.
